System 90

Fully adjustable and efficient when knock-up is required for all types of stock.

The Morgana System 90 jogger is designed to complement and interface with many machines in the Morgana range.

The Morgana System 90 jogger is an essential piece of equipment for printers who need to 'knock up' paper or carbonless sets in sizes up to SRA2+.

Key Product Features
- **Height & angle adjustable**
- **Adjustable rotation**
- **Mobile for use with many machines**
- **700mm x 520mm sheet size**

Because of the angle of the jogger and the fact that it is fully adjustable in height, the jogger can be wheeled up to various machines to act as a jogging catch tray making the delivery of sheets much easier.

It takes a 700mm x 520mm sheet size and has a robust motor which provides variable jogging power that will knock up the most demanding materials. Full rotation control is standard.

System 90

Fully adjustable and efficient when knock-up is required for all types of stock.

technical specifications

Maximum sheet size	700mm x 520mm
Dimensions	L 700mm x W 500mm x H 900mm
